

ATTENTION!

Where possible, limit the number of people in the vehicle so that all riders can remain a minimum of 6 feet apart. It is recommended that the same people share the same vehicle to minimize exposure.

The driver or passenger must clean the vehicle after use!

Use your discretion on whether you should clean the vehicle prior to use.

To properly clean a vehicle:

1. Put on a pair of gloves that are appropriate for the disinfectant you are using.
2. If surfaces are noticeably dirty, clean soiled surfaces with a detergent or soap and water before you disinfect them.
3. Use a disinfectant to clean all soft and hard surfaces:
 - Vehicle keys
 - External door handles
 - Steering wheel
 - Gear shifter
 - Radio and temperature controls
 - Seatbelts
 - Inside of the doors (handles and window controls)
 - Seats used by the driver and passenger(s)
 - Dashboard
4. Remove and throw away used gloves in the trash.

When fueling a vehicle:

1. Use a disinfectant to clean the fueling nozzles and keypads before you fuel the vehicle.
2. If you wear disposal gloves while fueling, remove and dispose of the gloves before you re-enter the vehicle.
3. Disinfect your WEX card.

Wash your hands immediately after you clean the vehicle, fill the vehicle with gas, or wash the vehicle windows at the gas station.

Line officers and supervisors should make sure each vehicle is stocked with a disinfectant (spray or wipes), nitrile or vinyl gloves, and an alcohol-based hand sanitizer with at least 60 percent alcohol (where possible).
